“From Ideation to Transformative Impact.”

SAN TECH stands for Smart Applications and Networking Technology. It is a Rwandan technology and innovation company founded in 2019 with branch in West Africa (Bamako -Mali) , focused on developing practical digital solutions, technological products, and technical capacity for organizations, businesses, institutions, and communities.

- **Positioning** : We operate at the intersection of technology implementation and product innovation: understanding a real operational problem, designing the system, building the software and hardware where required, deploying it, training users, and continuously improving it.
- **Core capabilities:** artificial intelligence, cybersecurity, Internet of Things (IoT), software engineering, embedded systems, systems integration and technology-enabled capacity building.
- **Philosophy** : Build locally where local engineering can create value. Design around actual workflows rather than forcing organizations into generic software. Treat cybersecurity, data governance and maintainability as design requirements. Pair technology delivery with human capacity development.

Service Area	Core Capabilities
Software Development	Web, mobile, desktop & enterprise applications
AI & Machine Learning	Intelligent automation, analytics, OCR, AI solutions
Cybersecurity	Security assessment, protection, monitoring & training
IoT & Embedded Systems	Sensors, automation, smart devices & connected systems
Digital Transformation	Process digitization and organizational transformation
Systems Integration	API, database, hardware and enterprise integration
IT Infrastructure	Networks, servers, cloud and infrastructure
Data Solutions	Databases, analytics, reporting and dashboards
Technology Consultancy	Architecture, strategy and technical advisory
Product Development	Prototype-to-production technology development
Capacity Building	Technology training, mentorship and innovation
Research & Innovation	R&D, prototyping and emerging technologies

Vision :To be a leading African tech hub that develops smart, sustainable technological products enhancing daily life and fostering innovation that contributes significantly to national and regional economic growth.

FLAGSHIP PRODUCT — E-VISITORS SYSTEM

This is gate management system combines software and hardware to capture, process and report information at entry and exit points.

It can be deployed in web-based, standalone or offline-oriented configurations depending on the environment. A specialized smart visitor, access, appointment, and security management technology platform.

The system has achieved massive adoption, notably deployed More than **47+ institutions like the Central Bank of Rwanda (BNR) , MAGERWA , CIMERWA , NIRDA , THE BRIDGE INTERNATIONAL (SOUTH KOREA) JUNIBIA HOST (SOUTH SUDAN , UPEFA (MALI) and more others.**

How it works!

Guest arrives → ID/document is scanned → information is captured → purpose/host is recorded → authorization is checked → visitor receives access/registration → entry is recorded → exit is recorded → management can generate reports.

SAN HUB

“Innovate • Empower • Deliver.”

An innovation, learning, and venture-building platform supporting technology training, internships, mentorship, research, entrepreneurship, and commercialization.

A dedicated corporate accelerator and innovation hub that has supported over **2,550+** beneficiaries through technical training, apprenticeships, and career development paths.

Advanced Tech Focus: Artificial Intelligence (AI), Machine Learning, Cloud Computing, Cybersecurity, Data Science, and Blockchain.

Hardware & Systems: Internet of Things (IoT) innovation, Embedded Systems, and Robotics.

HOW SAN TECH WORKS?

**CHALLENGE → DISCOVER → DESIGN →
DEVELOP → TEST → DEPLOY → TRAIN →
SUPPORT → IMPROVE**

SAN TECH Innovation & Technology

→ Product development, software, AI, IoT, cybersecurity, digital transformation and consulting.

SAN TECH Sustainability position

→ Implementing UN SDGs 4, 8 and 11, to deliver sustainability, impact-driven solutions, and community development

→ Contributing to the National Strategies for Transformation (NST2), and complying with the National Vision by emphasizing on technology impact.

SAN HUB

→ Training, mentorship, internships, innovation challenges, research, entrepreneurship and talent development.

E-VISITORS

→ A suitable for banks, government institutions, factories, hospitals, schools, corporate offices, estates, warehouses, industrial facilities and other high-traffic organizations.

Industry Sectors

We Serve

Industrial-sector clients

Custom digitalization and IoT engagements

Healthcare-sector clients

Visitor/access and digital workflow engagements

Education-sector institutions

Training and digital platform engagements

Hospitality-sector organizations

Visitor and operational digitization

SMEs and private sectors

Software, websites and operational systems

Development organizations

Digital transformation and capacity building

Research and innovation institutions

Applied technology and product development

Why Choose Us? (The Competitive Edge)

8+ years of combined technology and digital-transformation experience

OUR VISION FOR THE FUTURE

SAN TECH aims to grow into a leading African technology company that develops locally engineered, globally competitive digital products.

Our future focus includes:

- AI-powered enterprise solutions
- Advanced cybersecurity
- Smart infrastructure
- Industrial IoT
- Robotics
- Digital public services
- Enterprise automation
- Intelligent data platforms
- Locally developed technology products
- African technology talent development

“ Initiatives , Accreditations & Professional Recognition”

TECH FORWARD LIVE — SAN TECH Innovation & Technology Expo

TECH FORWARD LIVE is a technology and innovation expo/industry event initiated by SAN TECH to create a platform for:

- Technology demonstrations
- Innovation showcases
- AI and emerging technology
- IoT and smart systems
- Startup and solution exhibitions
- Industry networking
- Knowledge exchange
- Student and youth innovation
- Academia–industry collaboration

The initiative begin in 2026 , demonstrates SAN TECH's role not only as a technology service provider, but also as an innovation ecosystem builder and technology-community convenor.

SAN TECH Certification & Recognition Framework

REGULATORY COMPLIANCE

RDB • Corporate Registration • Statutory Compliance

National Cyber Security Authority in RWANDA

- Certified Data Controller • Certified Data Processor

INTELLECTUAL PROPERTY

E-VISITORS • Software Products • Technology Solutions

INNOVATION ECOSYSTEM

SAN HUB • TECH FORWARD LIVE • Innovation Development

SUSTAINABLE IMPACT

The Bridge International • Youth Empowerment by MOYA • Skills Development • Generation Unlimited • DOT international • UNICEF through implementation of SDG8.

TECHNOLOGY DEVELOPMENT

AI • IoT • Cybersecurity • Software • Embedded Systems • Digital Transformation

Meet SAN TECH Founders!

Mr. Shema Pacifique
CEO & Founder

Mr. Shema's expertise spans in Artificial Intelligence (AI), Cybersecurity, Internet of Things (IoT), software development, systems integration, digital transformation, embedded systems, data-driven solutions, and technological product development from ideation to deployment. He has been particularly involved in transforming real-world institutional and business challenges into practical digital solutions. Recognised leader by BPN, AMI, MOYA, and

Mrs. Niyonzima Claudine
COO & Co-founder

Her professional approach focuses on transforming ideas and organizational challenges into practical, scalable, secure, and sustainable technology solutions that create measurable operational and business value.

Recognised and Certified leader by YIM (Youth Impact Mission Global), AMI, and Youth Lead Organization, Digital Opportunity Trust.

Our expertise covers the complete technology lifecycle :

**Ideation → Research → Design → Development → Integration →
Deployment → Training → Support → Continuous Innovation**

SAN TECH

Governance, Compliance & Responsible Technology

Governance

SAN TECH promotes clear roles, controlled access, auditability, documentation and accountable delivery.

Data Protection (NCSA)

SAN TECH develops Systems involving identity and personal informations and designed with privacy, access control, retention and audit considerations appropriate to the use case.

Responsible AI

SAN TECH AI projects use appropriate data governance, human oversight, validation and monitoring, especially where automated outputs affect people or access decisions.

SANTECH
MAKING YOUR IDEAS HAPPEN

Let's Work Together

At SAN TECH, we believe every challenge can become an opportunity for innovation.

We combine engineering, creativity, emerging technologies and human capacity to transform ideas into practical digital solutions. From a single idea to a prototype, from a prototype to a product, and from a product to a scalable digital ecosystem — SAN TECH makes ideas happen.
